Ideas for journaling for class assignments

1. What is the most compelling part or aspect of this reading selection and why?
2. What is implied in the text? How do you know? What is explicit in the text?
3. Create a short list of “understandings” that emerge as you read. Consider ideas or concepts this text has taught you. How could these understandings shape our society?
4. What values, customs, ethics, beliefs, or ideologies are included in the work? Identify specific examples in the text that support your opinion.
5. What message does this text aim to communicate about its world? By implication, your world? What does it suggest about how people relate or should relate to one another? Does the text challenge your beliefs or support them? Why?
6. Find a passage that creates cognitive dissonance for you. Why do you think the text has that effect on you?
